

Please leave the New Jersey Do Not Call law as is. We were originally plagued by calls from telemarketers. This was a particularly big hardship as my husband who is disabled and a very sick man who would be harassed by the same callers all the time before we signed up on this list. He wouldn't have even answered the phone except he was often waiting to hear back from Doctors or perhaps a family member. His eyesight isn't good enough to always determine who's calling from Caller ID.
